

HOW DO YOU PREVENT ZIKA IN GEORGIA?

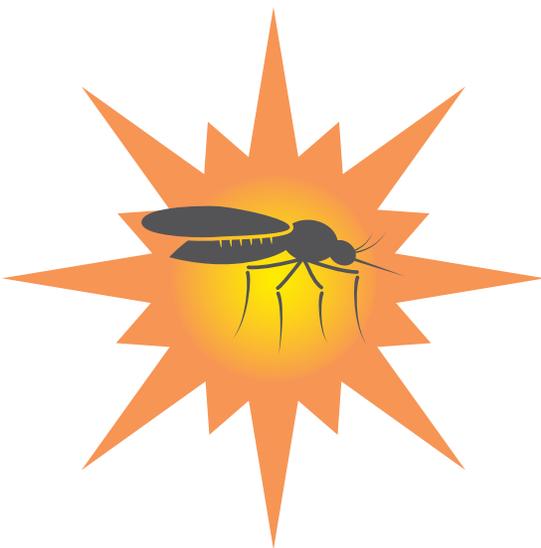

TIP 'n TOSS

WHAT ARE SOME THINGS I CAN DO?

- Clean up around your home and yard
- Get rid of anything you don't need that can hold water
- Use larvicides (**Mosquito Dunks®** or **Mosquito Torpedoes®**) where you can't dump out water
- **Tip 'n Toss** containers after every rain and at least once a week
- Dump out standing water in flowerpots and planters, children's toys, pet dishes
- Don't let water accumulate in old tires, rain gutters, piles of leaves or natural holes in vegetation
- Cover water storage containers (buckets, cisterns, rain barrels)

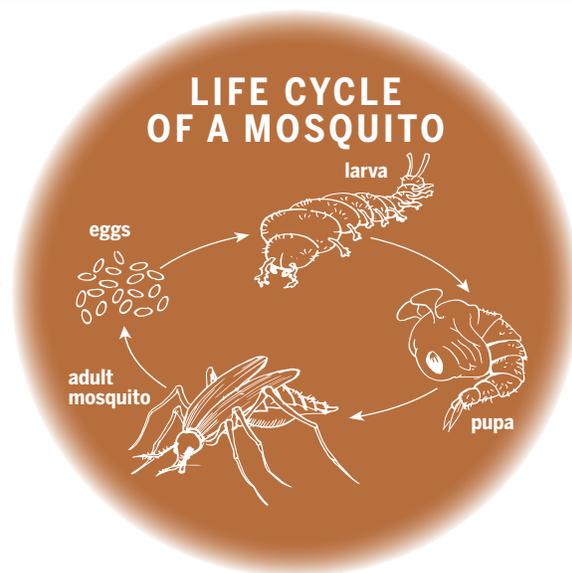

NO VACCINE TO PREVENT • NO MEDICINE TO TREAT

MOSQUITO LIFE CYCLE

- Mosquitoes need standing water to breed
- Adult, female mosquitoes lay their eggs inside containers
- Mosquitoes lay hundreds of eggs at a time
- Mosquitoes go from eggs to adults in a week to 10 days
- Only female mosquitoes bite
- *Aedes* mosquitoes bite primarily during the day, but some bite at night
